Teacherfest Programme 2024 - *Learning about Learning*

Welcome to the Programme for Bristol Teacherfest 2024

Bristol Teacherfest is back for its fifth year. This annual festival of learning and teaching provides an opportunity for teachers across Bristol to come together to share their expertise and experience, and to learn with and from each other. There is immense talent in schools across the city and we want to celebrate this and to create opportunities for collaboration. Whether you are a teacher of many years standing or are new to the profession, please come along.

This year we are shining a spotlight on computer technology and AI. The impact that AI might have on education in a wide range of ways has been occupying minds across the globe and we want to explore what it might mean for schools, for teachers and for teaching and learning. A number of partner schools as well as our two partner universities are already looking at this in some depth and will be generously sharing their findings and encouraging discussion.

There will be lots of other sessions focussing on specific subject areas, whether it be history, science, climate change, oracy, MFL, PSHE, EAL or SEND to name a few. Alongside BEP school staff, a number of external organisations will be contributing, including STEM Ambassadors, Historic England, University of Bristol - and more.

We are at our best when we work together and the spirit of Teacherfest is to make space for collaboration. Come and join us!

BEP Organising Committee
Gary Buchanan - Cotham School
Chris Brotherton - QEH
Fiona Carnie – BEP
